Aerospace IT launched as part of the inaugural Aviation Week Network Aerospace Incubator series. Aerospace Incubator is intended to take relevant niche topics forward by bringing together stakeholders and thought-leaders to advance the industry. Aerospace IT plays an essential role in moving the Aerospace sector through Industry 4.0. The 1.5 day conference and showcase looked at the need for industry to develop foundational IT systems and establish integrated processes, with a connected infrastructure backbone, on which more intelligent systems can be built and explored the route to achieving this.

The event brought key players together, from across the value chain, to look at applications for these systems across the aerospace eco-system and delve into the underlying need to overhaul the regulatory systems, which govern the framework on which these technologies can be applied.

Key Topics Addressed:

- Software Modernization & Legacy System Replacement
- Data Ownership, Analytics & Management
- Cyber Security & Biosecurity
- Digital Infrastructure for Operators & End-Users
- Implementation and Adoption of Innovative Technologies

“The breath and knowledge of the speakers was outstanding. I prefer the intimate setting of the event and also that the sessions were kept in one room. That allowed everyone to really attend each session and be engaged. Also it provided everyone to actually meet and truly connect because you are not competing with a larger group. Aside from the speakers, the audience was made up of the top of the line professionals who are responsible on a daily basis for the lives of many. This conference definitely supersedes others.”

Regine Bonneau
CEO, RB Advisory

“We found the conversations to be insightful and the opportunity to establish some new relationships was quite welcome. Look forward to staying engaged with you in such forums.”

Arun Chhabra
CEO, 8Tree

“It was a privilege to participate; thank you for including me. I honestly started taking notes during my session because my co-panelists were addressing pain points I myself experience! I thought the conference was great and I’d be delighted to support a future session.”

Michael Schlotterbeck
Smart Factory Asset Leader, Deloitte
